4	Potential Created	1358 Ha.	175.14 Ha	-
5	Balance Potential to be created	667 Ha.	18 Ha.	1025 Ha.
6	No. of Pumps installed	6 + (1) one stand bye (220 H.P.Each Centrifugal type)	1+ (1) one stand bye (80 H.P.Each Centrifugal type)	3 +(1) one stand bye (235 H.P. Each Turbine type)
7	Transformer	1250 K.V.A.(Out Door type)	100 K.V.A. (Out Door type)	-
8	Canal System: Left Bank Canal	19.76 K.M.	3.50 K.M.	7.00 K.M.
	Right Bank Canal	9.75 K.M.	2.50 K.M.	14.00 K.M.
9	Latest stage	Tendered for the construction of Aquaduct coming between 10 th K.M. to 11 th K.M. of left bank canal. Compensation for the lands between 14 th K.M. to 20 th K.M. is under award stage. As soon as the payment is made, the tendering process will be initiated immediately. The work will be taken up on top priority so as to create balance potential of 667Ha.	Construction of Aquaduct in 1st K.M. of Right bank canal is under progress.. As soon as this is completed, balance potential of 18 Ha. will be created.	For time being the project is stopped. Ryots of surrounding village have urged the Govt to initiate the scheme from Exit of Bagur Navile Tunnel. They have strongly protested this scheme. The report regarding the above has been submitted to higher authorities for getting clearance.
10	FIC'S	460 Ha atchkat has been given water through FIC'S & 25.00 lakhs grant has been given for 2010-2011. It is programmed to give water for 333 Ha in Right bank canal .	Since this scheme is minor, all pipe outlets are direct outlets feeding to the fields. There is no separate for construction of FIC'S.	Since the scheme is still in initial stage, it does not arise.
