

GOVERNMENT OF KARNATAKA

No.RD 28 MRR 2001

Karnataka Government Secretariat,
M.S.Building,
Bangalore, dated: 10th September 2001.CIRCULAR

Sub: Procedure for writing of crop details for the year 2001-02 by Village Accountant reg.

The scheme of computerisation of Land Records has been already operationalised in about 80 taluks. It is hoped that in near future scheme would also be operationalised in remaining taluks. In operationalised taluks as per circulars issued from time to time, one copy of computerised RTC of all Survey Nos had to be provided to Village Accountants. Another copy was to be provided to farmers.

The revenue year 2000-2001 has come to an end on 30th June 2001 and the revenue year 2001-2002 has since then started. The crop details for the year 2001-02 are now to be written by Village Accountants. While the methodology to update the huge crop details on Bhoomi is being finalised at government level, the following instruction for working crop details by Village Accountants are being issued for immediate compliance.

1. In respect of such taluks where scheme of Computerisation of Land Records has still not been operationalised, the crop details will be written on the manual RTC book available with Village Accountants.
2. In respect of such taluks where the scheme of Computerisation of Land Records has already been operationalised, the crop details will be written on the copy of computerised RTC which has been made available to the Village Accountant for all Survey Nos of all villages.
3. In case some of the copies of computerised RTC provided to Village Accountant had errors & were given back for correction then to that effect, Deputy Commissioners would get those corrected RTCs back to Village Accountant from data entry agency if it was given to them or from Bhoomi centre if it was given there for correction so that Village Accountant has full set of RTCs for all Survey Nos. It may be noted that the first copy of final printouts of RTC which was corrected by Village Accountant & given back to data entry agency or Bhoomi operator can itself be used for crop updations for the year 2001-02.
